Automated Detection

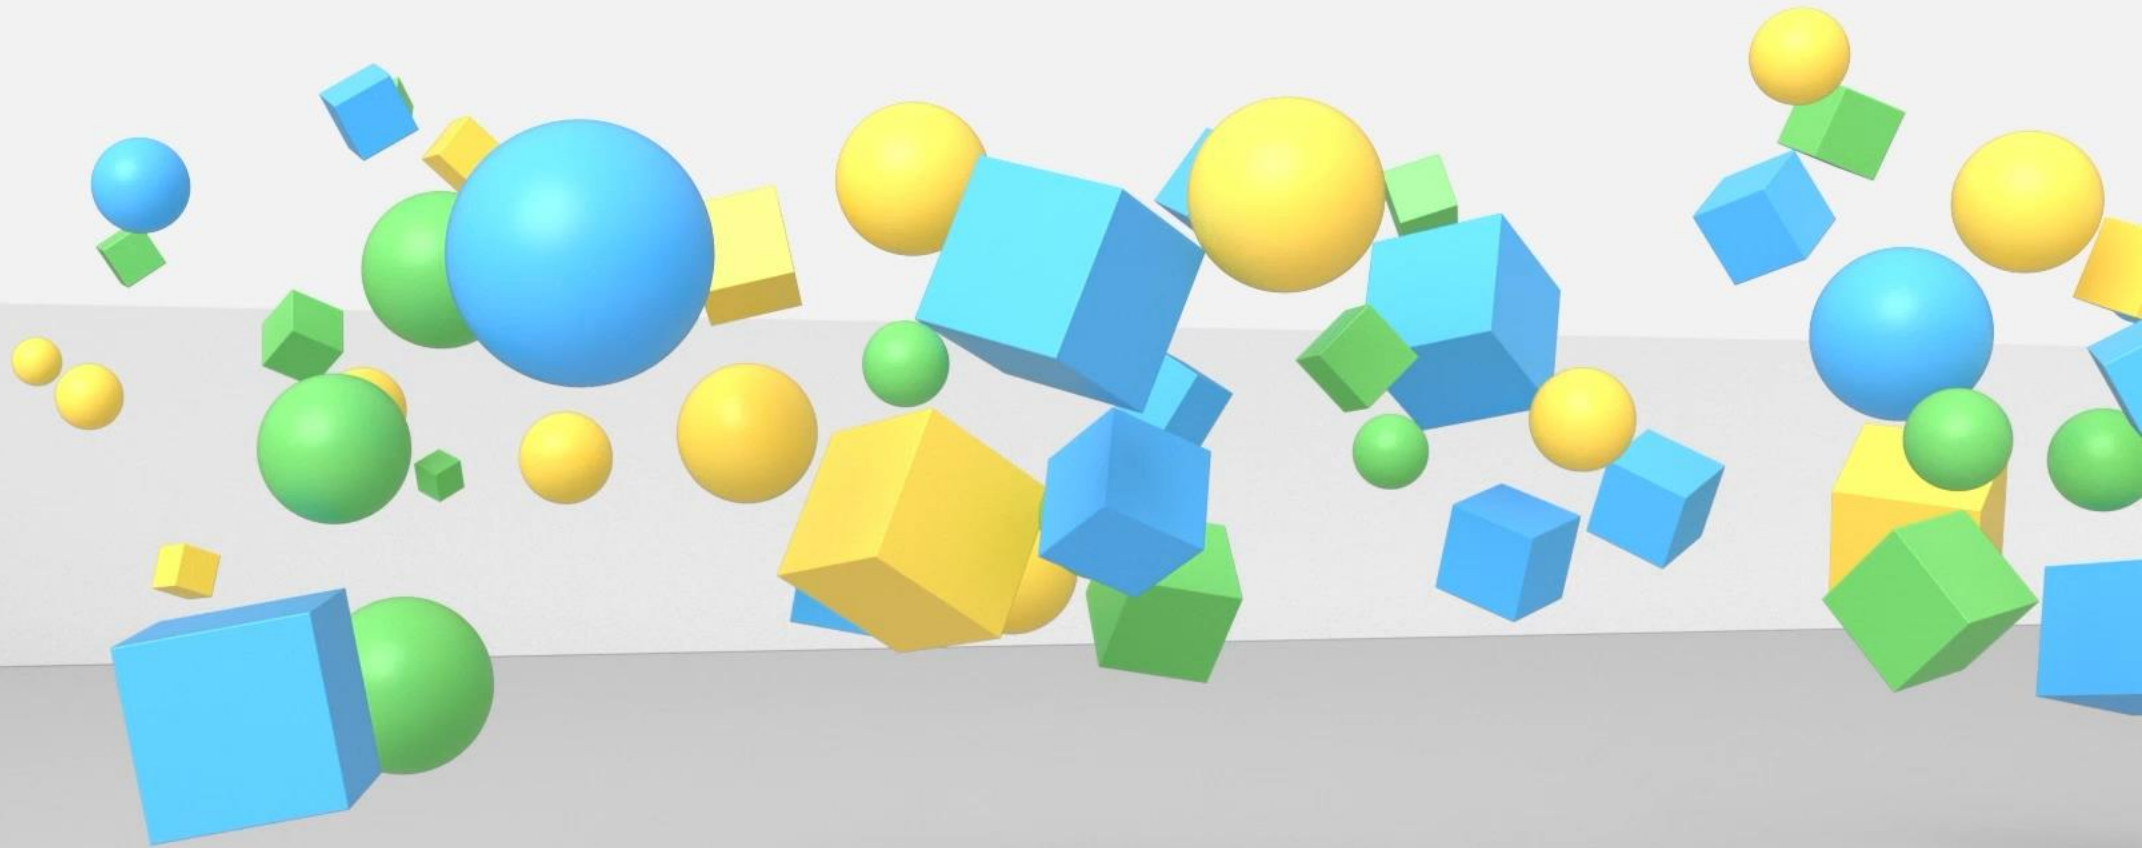

Automated detection

- Aviation and maritime '**virtual networks**': radar images
- **Nuclear detection gates**
- **Non-intrusive scanning equipment** and algorithms
 - **Artificial intelligence** systems that assess scanned images and signal irregularities
 - Predictive models for goods scans
- **Infrastructure** to store, collect and process sensor data

- **Projects** on X-ray scanning and detection technology Dutch Customs
 - C-BORD (*Effective Container Inspection at Border Control Points*)
 - ACXIS (Automated Comparison of X-ray Images for cargo Scanning)
- Shifting (in parts) towards **100% inspections** based on state of the art technology.

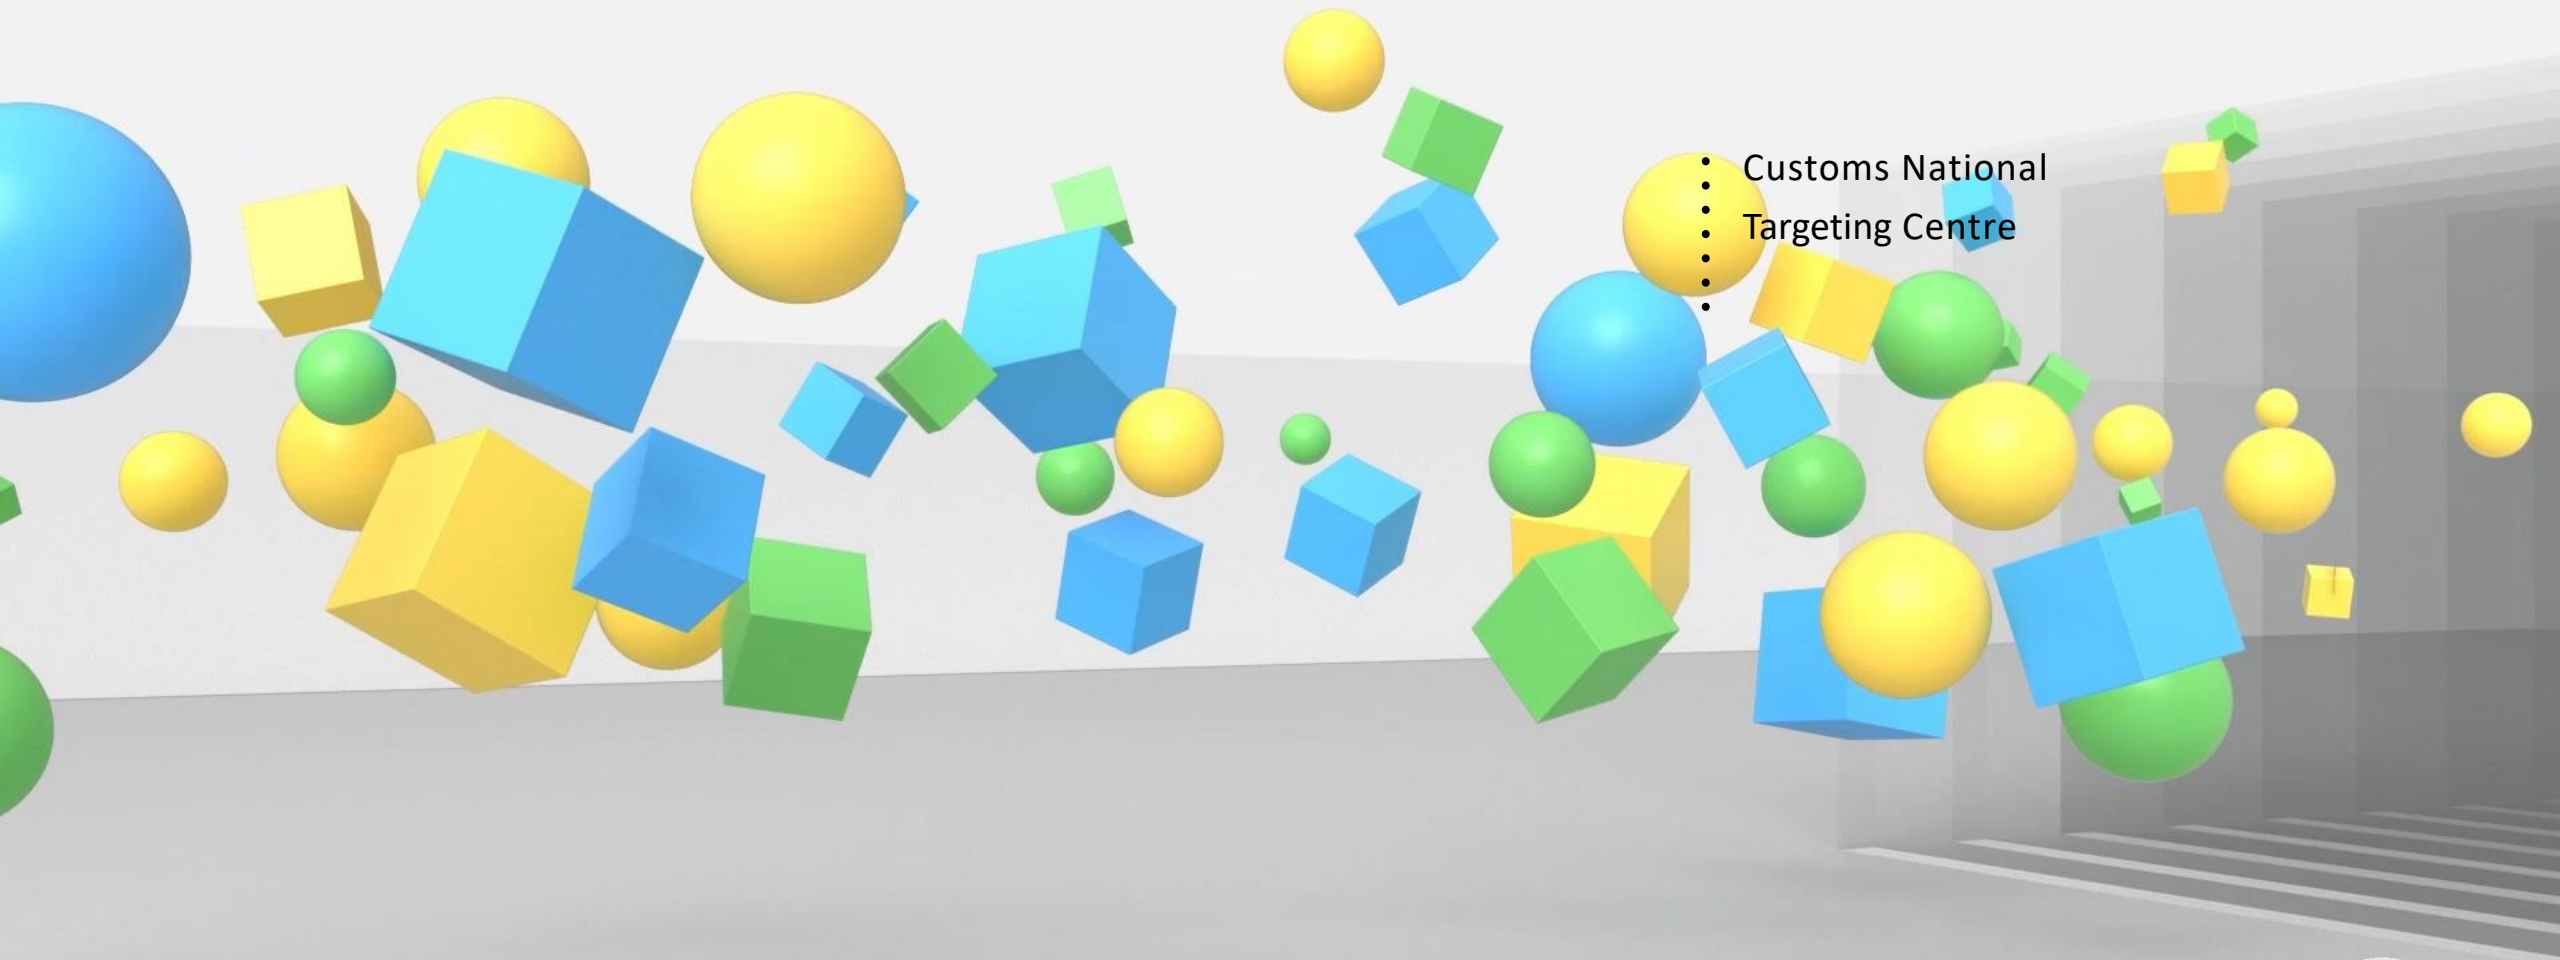

Risk selection
